Subject: Hickman's Egg Farms petition to ATSDR

Hi Colleen and Dan,

I think Libby already talked with Dan, but I wanted to give you/EPA a heads up that ATSDR received a petition from Don't Waste Arizona and Save Tonopah Oppose Poultry Plan (STOPP) to conduct a public health assessment of ammonia emissions from Hickman's Egg Farms facilities in Tonopah and Arlington, Arizona. We are in the process of reviewing the petition and gathering additional information to help ATSDR decide whether or not to conduct public health assessment activities. (General information on the ATSDR petition process is available [here](#).) At some point we'll want to connect with y'all to learn about EPA's activities related to these facilities. We are going to start with ADEQ since they did some modeling of ammonia emissions.

Are there others at EPA we should be in touch with about this issue?

Thanks,

Ben
